

# Levente Simon

Strategy • Architecture • Security • Leadership

*Technology executive who still builds production systems. 25 years leading international teams, architecting solutions, and delivering transformation programs across Europe and the Middle East. Now advising organizations on technology strategy, architecture, and capability building.*

Regional Director	Ground-up security organizations (Telenor Hungary, TnCO, CETIN) across multiple countries, 10M+ subscribers. Direct CEO reporting.
EUROCONTROL	Senior architect and interim DevOps leader for European aviation modernization. Safety-critical systems, cloud transformation.
Corporate Separation	Led security stream for multi-country spin-off (CETIN/Telenor CEE—now e& company). Technical, financial, organizational scope.
Currently Shipping	Solo-built dethernet, a graph-native, modular, AI-powered threat modeling platform. Production code, not slides.

## What I Deliver

### For Boards & Investors

- Technology due diligence for M&A
- Architecture and security assessments
- Independent expert before major decisions

### For Growing Organizations

- Fractional CTO / CISO
- Ground-up team and capability design
- Security architecture that enables speed
- AI strategy with hands-on technical depth

### For Transformation Programs

- Program leadership for complex initiatives
- Architecture with implementation accountability
- Troubled program rescue

*Most advisors stopped building years ago. I still ship production code and architect complex systems.*

*When I evaluate your architecture or challenge a timeline, it's from current hands-on experience, not frameworks or decade-old memory.*

### What this means to you:

- The full picture, including the hard parts
- Advice I'd stake my own architecture on
- One conversation from board deck to implementation detail
